STUDENTS WITH COMPLEX LEARNING PROFILES

STATISTICS
2020

Department of Inclusive Education
Ministry of Education
Republic of Maldives

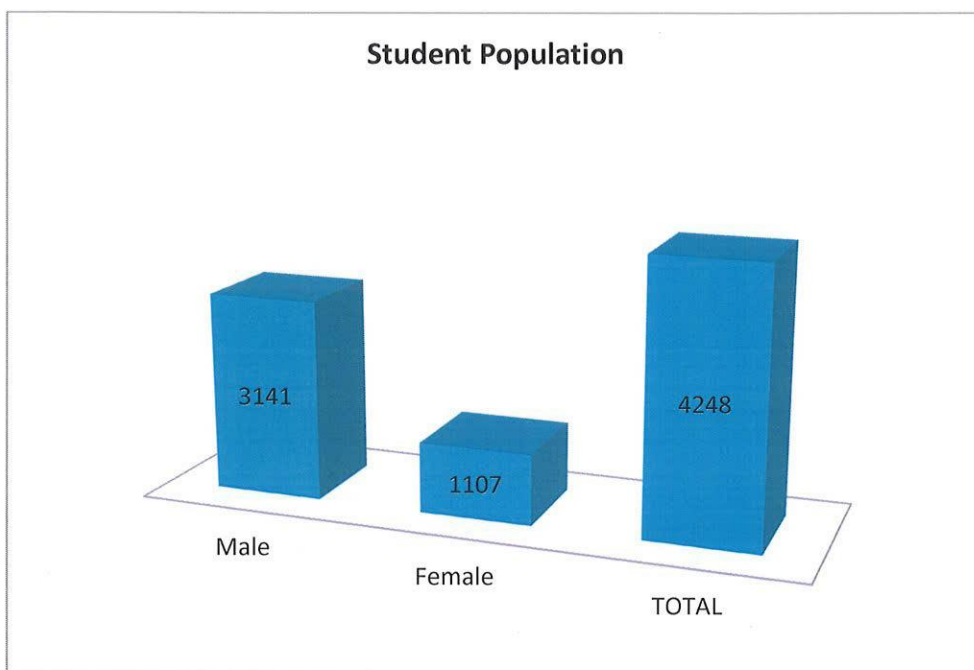

Introduction

This report consists of data collected from all the schools about children with complex learning profiles (CLP) and teachers teaching to them. Children with CLP consist of children with diverse learning needs; among them are the children with special educational needs and students with various disabilities.

Reliable statistics are crucial in decision making and managing the education system for children with CLP. The relevant data are presented in the graphs below. These statistics provide critical information to policymakers, educators, administrators, researchers and other stakeholders.

Students

Figure 1. Total number of students by gender

Total number of Students in all the school

Figure 2. Government schools

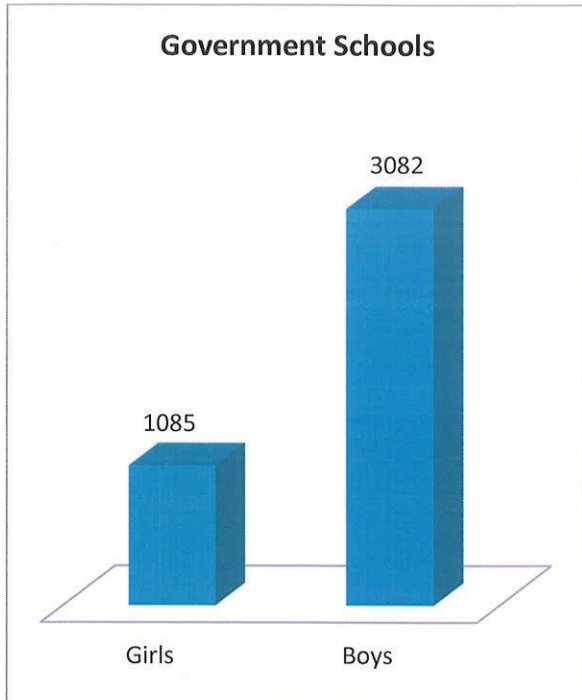

Figure 3. Private Schools

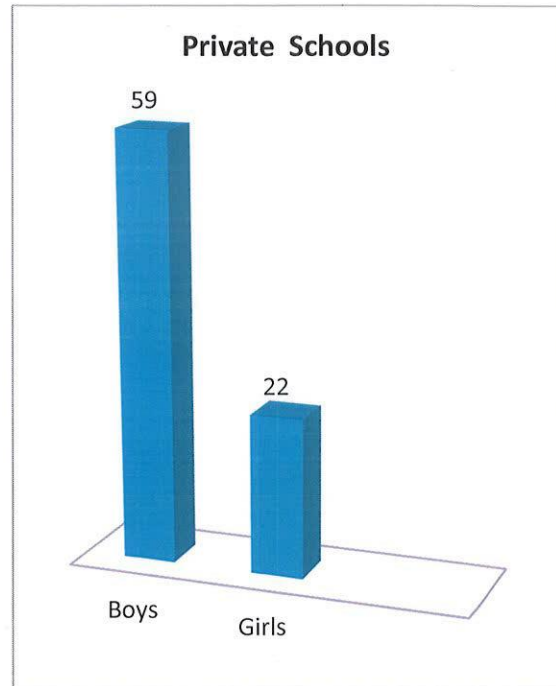

Figure 4. Number of students in different categories

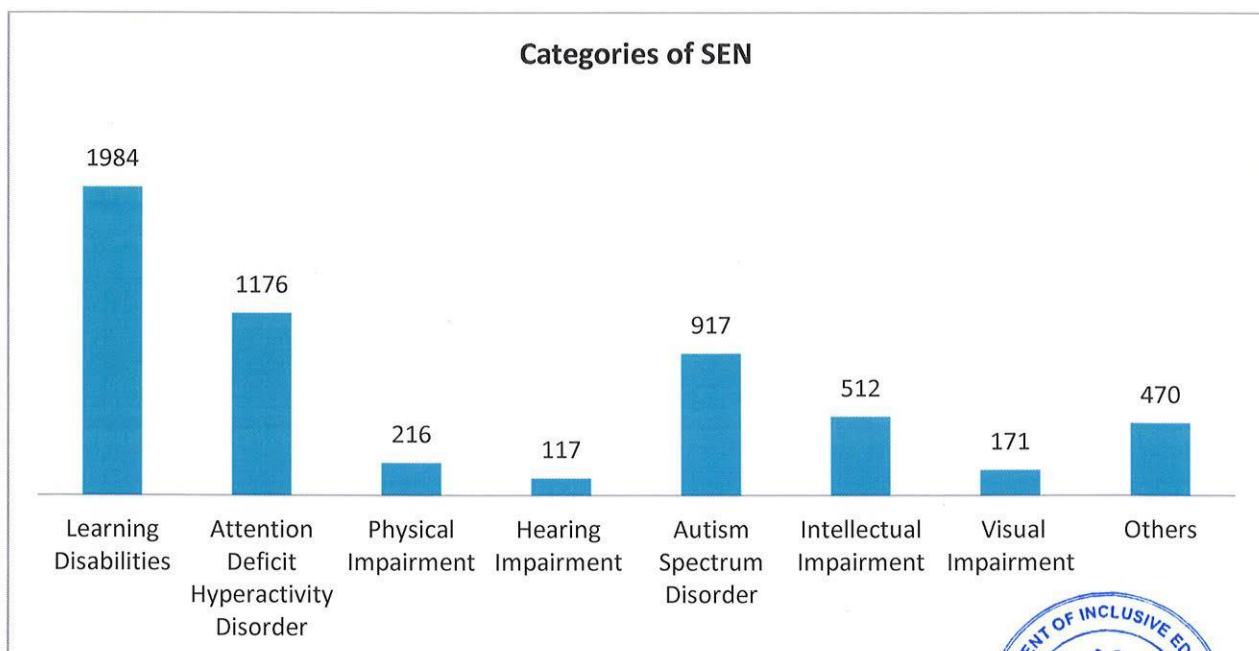

Figure 5. Number of students attending learning programs from the IEP

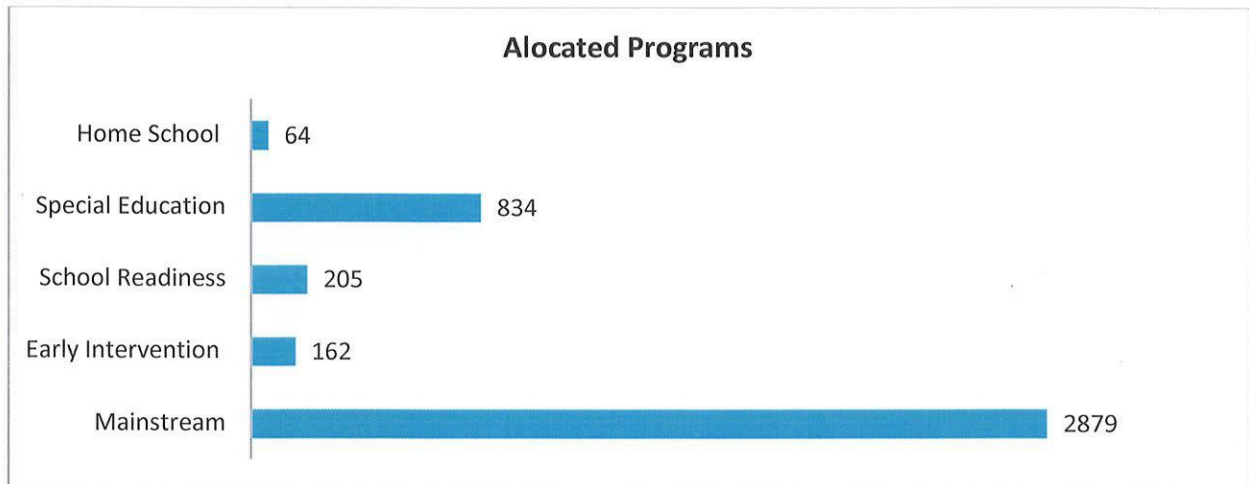

Figure 6. Number of students in the Cities

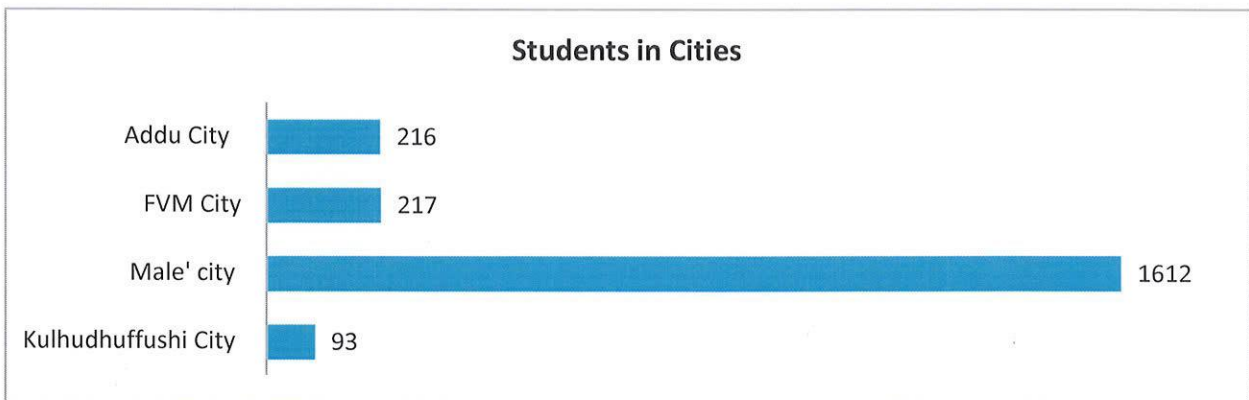

Figure 7. Number of students in the administrative zones

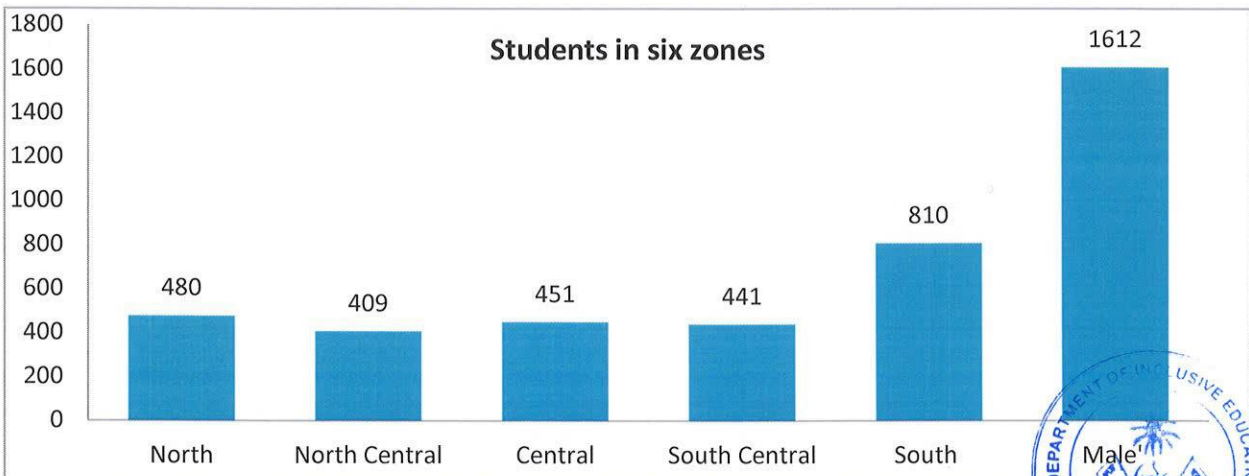

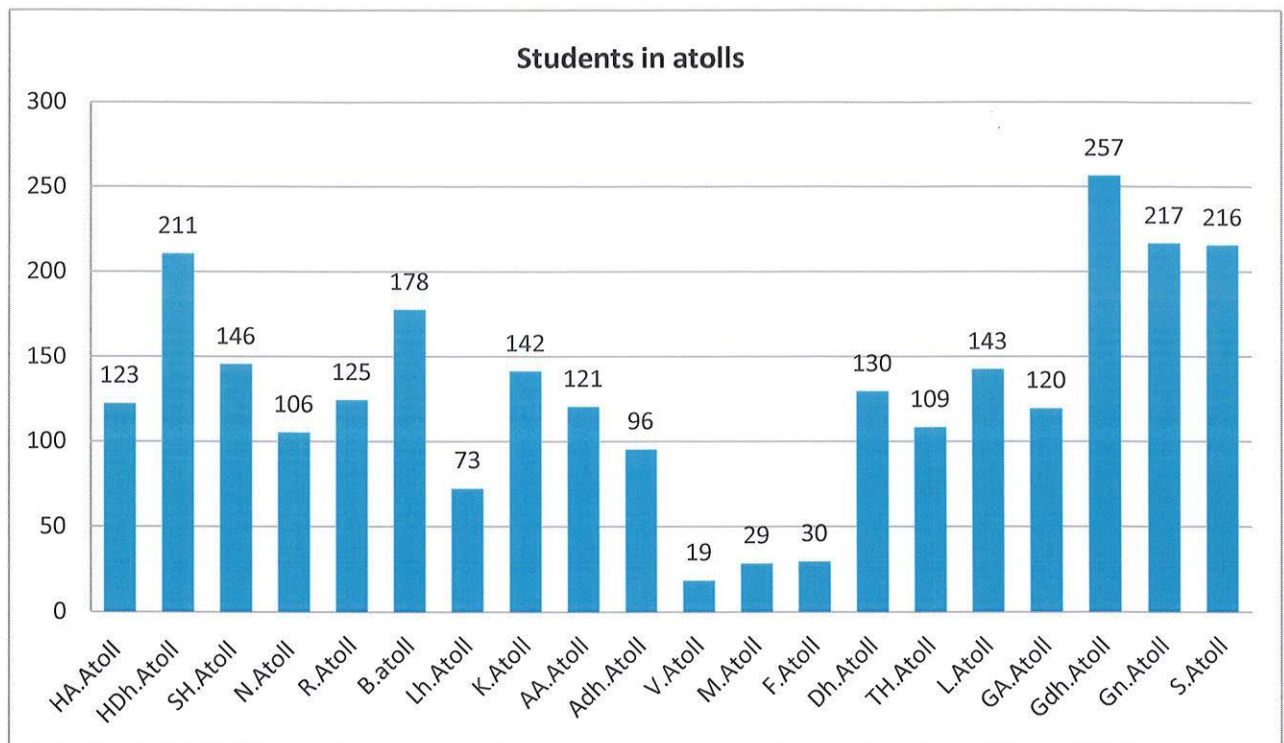

Figure 8. Number of students in twenty atolls

Teachers

Figure 9. Total Number of teachers in schools teaching students with CLP
